**How do I schedule an appointment to have a mammogram?**

Please call 1-855-655-BMMC (2662) for more information on the tour dates and to schedule an appointment.

**What are the eligibility guidelines for a screening mammogram?**

- Must be a woman 40 years or older
- Must have a primary care physician (a report will be sent to patient and their physician)
- Must be at least one year since previous mammogram
- Must not be pregnant or breast-feeding
- Must not have new breast lumps, breast skin or nipple changes, or nipple discharge (patients with these symptoms should promptly contact their physician for evaluation and possible referral for a diagnostic mammogram)

**What is a screening mammogram?**

A low-dose x-ray exam of the breasts. It typically includes 2 images or pictures of each breast and is performed by a licensed Charlotte Radiology technologist, certified in mammography. A board-certified radiologist specialized in breast imaging will interpret the results of your exam.

**What if I have a breast lump or other breast symptom?**

The Center offers screening mammograms - a “wellness” check for your breasts. A diagnostic mammogram is used to evaluate an existing problem, and is a more comprehensive exam that may include specialized views and/or ultrasound. Please contact your primary care physician for evaluation so he/she can refer you for the appropriate exam.

**Who performs the mammograms on BelkGives On the Go Mobile Mammography Center?**

All screening exams are performed by Charlotte Radiology’s licensed female, mammography-certified technologists.

**Who interprets mammograms performed on the BelkGives On the Go Mobile Mammography Center?**

A board-certified radiologist, specialized in breast imaging will interpret your mammogram. The confidential results will be sent to you and your primary care physician.

**How should I prepare for my mammogram?**

- Bring your prior mammogram(s) or name/address of the facility where you had your most recent exam. Having priors available at your appointment will expedite the time needed to interpret your images and provide results.
- Do not wear powder, deodorant, lotion or perfume under your arms or on your breasts. Deodorant will be available to you after your exam.
- Wear two piece clothing for convenience.
- Bring pertinent history to your appointment: prior surgeries, hormone use, family/personal history of breast cancer.
- Bring photo ID & insurance card (if applicable) to appointment.
